

Bleach²

[Bleach Bleach]

- ◎Product name: Bleach for clothing, kitchen items, and a house
- ◎Purpose: For clothing, kitchen items and tools, a drainage pipe, and a washing machine tub of a fully automatic washing machine
- ◎Type of the water solution: Weak alkaline ◎Amount of use: 10g per 30L of water when used for washing of clothing

For various purposes related to clothing, kitchen items, tableware, and a house

Elimination of bacteria

Removal of odors

Clearing stubborn stains and yellow tints with the powerful bleaching agent. Whiteness and brightness of clothing will revive.

Merit 1

A multi-purpose product highly useful for tableware, clothing, and items associate with a house.

The high-quality powder oxygen-based bleach can be used for various purposes in everyday life including removal of stains on clothing not made of wool and silk, underwear, socks, kitchen items, a drainage pipe, a washing machine tub, a bathroom, a gas range as well as elimination of bacteria.

Merit 2

Because this product is oxygen-based, no poisonous gases will be emitted, so it is safe to use.

Unlike a chlorine-containing bleach, this product does not emit poisonous gases, so no worry is needed. In addition, this product does not generate irritating odors or oily touch.

Merit 3

Stubborn stains can be washed away by soaking the clothing in water.

Thanks to the excellent cleaning and bleaching effects of the surfactants, enzyme activators, and bleaching activators, stubborn stains around collars/cuffs that have been difficult to remove with conventional bleaches can now be washed away by "soaking" the clothing in water.

Merit 4

Powerful effects of removing unpleasant odors as well as eliminating bacteria.

Everyone always wants to keep the wiping cloth for kitchen use and chopping boards clean, and this product is just perfect. If used for washing regularly, this product is effective for eliminating bacteria and removing odors of clothing and diapers.

◎Materials and items cannot be used with this product

Textile products made of wool and silk/items whose colors lose when in water or in a laundry detergent/textile products dyed with a metalized dye/items made of iron such as frying pans, Chinese frying pans, and kitchen knives/items made of copper such as copper pots/steel plates made of brass and zinc because they corrode/silverware/tableware with gold and silver paint lines/ lacquerware such as coated items and Japanese-style bowls because the coating may peel off/motors of ventilators and blenders

*The preferable material of a container is plastic for bleaching. Please do not use a container made of metal.
*Please keep the amount described in the Amount of use.
If used more than that, heat may be generated.

SOFTENER AC

[SOFTENER AC]

- ◎Product name: Fabric softener
- ◎Purpose: For clothing made of cotton/ wool/synthetic fibers
- ◎Type of the water solution: Weak acid
- ◎Amount of use: 2mL per 10L of water

For clothing made of cotton/ wool/synthetic fibers

Anti-static

Softness

Fragrance of floral fruity

Providing clothing with gentle treatment with excellent softness and absorbability.

Merit 1

Soft and gentle touch on the skin

With the use of the plant-derived cationic surfactant, gentleness and softness on the skin enhanced as well as softness of the underwear and towels improved. Stockings and lingerie will become more elegant.

Merit 2

High absorbability

After clothing and towels are softened with this product, they will absorb more water and sweat as well as will dry sooner, giving fresh touch on the skin.

Merit 3

Control annoying static electricity.

This product prevents static electricity from building up on sweaters made of synthetic fibers and blouses that results in annoying shock around the body. This also contributes to prevent pill of wool as a result of attached dust.

Merit 4

An antimicrobial agent is added.

This product prevents bacteria from growing and controls unpleasant odors.
